DELIGHT TRIP WEBSITE REQUIREMENTS

Our project name is Delight trip website which has many parts and facilities.

This is a tourist guide online website which is about Kandahar city. Trip is an experience and adventure of life that we learn and enjoy many things but to this condition that we had plan it well and before going somewhere we have some additional information about that place through this way we will enjoy it perfectly.

This project is based on how an effective travel website will make us feel. It is based on a traveling website with fully-featured functions that will activate the traveling bug with vibrant imagery. This website contains highlights of some important places along with high-quality photography and allows people to see their dream destination. This website is very helpful for those who wants to visit Kandahar city and it also provide lactation. on the other hand, it can

be repository of information about Kandahar. In addition, it attracts many tourists.

It has following parts:

- Home page
- Login
- Join
- Contact us
- Top attraction
- Top restaurant
- Top hotels
- Super markets

Programing languages:

- HTML
- CSS
- JAVASCRIPT

JAVASCRIPT PART:

As above we mentioned that we have login and join pages that in these pages we will use

JavaScript functions and methods a lot and in others parts also for actions we need JavaScript

DOM

- The getElementById method
- The innerHTML property
- Set attributes method
- Create element method
- Document.cookie
- Document.doctype
- Document.form
- Document. Link
- Document.url
- Document. Body
- Document. Domain

EVENTS

- Mouse events
- Keyboard events
- Document events
